

We Grow Thinkers!

ENRICHMENT MENU

Challenge

Thinkers will be encouraged to take risks and leaps of faith in their learning and pursue knowledge in new and ambiguous ways. This often leads to discomfort and confusion but ultimately paves the path toward remarkable innovation.

Support

With great challenge comes the potential for great failure as all great thinkers inevitably falter – but with adequate and effective support from nurturing and experienced thinking ambassadors, students will reflect, adapt, and strive for more satisfying results.

Habits of Mind

All great thinkers exhibit intelligent behaviors that lead to success in school and beyond. By developing and strengthening these skills through all contents, thinkers will be equipped to successfully deal with challenges independently.

21st Century Skills

The changes in our global society have modernized the way we approach learning in our country. A well-rounded skill set has been identified as a framework for preparing our young thinkers for success as 21st century citizens.

Problem Based Learning

Putting thinkers at the very center of their education, problem-based learning offers rich, active learning opportunities focused on the investigation and resolution of messy, real-world problems. Rigorous and relevant learning sharpens 21st century skills.
